Amber Alex Lee

(916) 934-8590 | lee.amber.alex@gmail.com | Seattle, WA
https://www.linkedin.com/in/leeamberalex | amberalexlee.com | https://github.com/lee-amber-alex

Front-end Web Developer who values teamwork and collaboration. Extensive client-facing background in film and product marketing. Motivated by challenges and the pandemic, recently completed a full-stack web development course from University of Washington to complement customer service experience. Adept at translating technical requirements into business solutions. Seeking to utilize communication and technical expertise to increase revenue and strengthen company/client relationships.

TECHNICAL SKILLS

Languages: JavaScript, CSS, HTML, SQL, NoSQL
Applications: GitHub, Heroku, MongoDB, MySQL
Tools: AWS Certified Cloud Practitioner**,** Express, React, Node, Handlebars, Bootstrap

PROJECTS

Ballyhoo Bulletin | https://github.com/Ballyhoo-Bulletin/ballyhoo-bulletin | https://ballyhoo-bulletin.herokuapp.com/
A community bartering web application for goods and services swap without monetary exchange.
- Project Manager; collaborated and led a team of 4 developers to design, develop, debug and deploy the web application within 2 weeks working 100% remotely using Zoom & Slack.
- Leveraged cross-functional communication with the team to prioritize tasks and resolved communication issues throughout the project.
- Researched and recommended new technologies for data storage.
- Frontend development; built RESTful APIs, created wireframes and prototypes for the UI using Figma.
- Backend development; integrated MongoDB and Cloudinary for capturing and storing user data.
- Utilized GitHub for code exchange and task management.
- Assisted with troubleshooting deployment to Heroku.
- Presented the final application demo to a group of 65 developers for peer review.
- Tools: HTML, CSS, JavaScript, Axios, Express, Firebase, Mongoose, Node, React.

Bantr | https://github.com/ziieng/Bantr | https://bantr.herokuapp.com
Social media platform to communicate with friends, colleagues and family that doesn't track/sell user information.
- Collaborated with a group of 4 developers to create and enhance the UX, test and implement changes to the application, working 100% remotely via Zoom and Slack.
- Frontend development; planned UI flow using Figma and created layout utilizing Bootstrap and CSS.
- Participated in technical design sessions to develop UX solutions.
- Assisted with code and task management using GitHub.
- Communicated final project challenges to a group of developers seeking debugging solutions.
- Tools: HTML, CSS, JavaScript, Bootstrap, MySQL

GameFlix! | https://github.com/lee-amber-alex/Gameflix | https://tommywillen.github.io/Gameflix/
An application that provides movies and video game suggestions based on user responses from a personality questionnaire.
- Joined with a team of 4 developers to develop and deploy the web application within 2 weeks working 100% remotely using Zoom & Slack.
- Frontend development; prototyped UI format using Figma and designed layout utilizing UIkit and CSS.
- Directed UI aesthetics and debugged CSS issues.
- Assisted fellow group members with completing design tasks.
- Utilized GitHub for code and task tracking.
- Tools: HTML, CSS, JavaScript, Axios, jQuery, Bootstrap, Express
